REASONS FOR ALLOWANCE

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on **12.08.2009** has been entered.

Acknowledgements

2. Applicants' amendment filed on **12.07.2009** has been entered and are persuasive.

The Abandonment sent on **12.08.2009** was withdrawn and is vacated in light of this new Office action (Reason for Allowance) because the Request for Continued Examination (RCE) was properly filed on **12.07.2009** with an extension of time that was granted on **12.07.2009**.

EXAMINER'S AMENDMENT

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: **claims 27-107** are cancelled.

Examiner's Statement of reason for Allowance

4. The following is an Examiner's statement of reasons for allowance:

The most relevant reference is the Krist **US 6,038,540** reference. Krist discloses an adaptive process control and profit depiction system which is responsive to both process measurement input signals, economic inputs, and physical environment inputs. The process control system features an interactive optimization modeling system for determining manipulated process variables (also known as setpoints) [abstract].

Krist neither anticipates or fairly and reasonably teaches as to "a scheduler adapted to establish different schedules for delivery of information" from multiple data sources to the information server "based on different user profiles or different user configurations stored concurrently on the information server and associated "with different users", and "wherein the first and the second data sources are adapted to automatically send the economic data and the process control data to the information server, as prescribed by the scheduler, via first and second messages and wherein the router is adapted to process the first and second messages to determine that the economic data and the process control data contained within the first and second messages is to be sent to the model and to automatically deliver the economic data and the process control data to the model".

Thus, the combination of claimed features is not disclosed in a reasonable manner.

The cited but not applied Foreign Document art: Parker et al., Distribution System for Structured Information, May 12, 2001.

However, Parker neither anticipates or fairly and reasonably teaches as to "a scheduler adapted to establish different schedules for delivery of information" from multiple data sources to the information server "based on different user profiles or different user configurations stored concurrently on the information server and associated "with different users", and "wherein the first and the second data sources are adapted to automatically send the economic data and the process control data to the information server, as prescribed by the scheduler, via first and second messages and wherein the router is adapted to process the first and second messages to determine that the economic data and the process control data contained within the first and second messages is to be sent to the model and to automatically deliver the economic data and the process control data to the model".

Thus, the combination of claimed features is not disclosed in a reasonable manner.

For this reason, **claim 1** is deemed to be allowable over prior art of record and **claims 2-26** are allowed by dependency.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,

Art Unit: 3687

should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
